

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
1	16/02/2017	Capernwray	17.4m	4c	Chris	CH	First dives of the year and cold ones at that with the lowest temp around
2		<b>1. ( Podsnap )</b>			Ken		4 centigrade. Ken's earplugs seemed to work well which was good news
3					Mel		as this was a make or break dive for him. Despite few divers at site the
4					John		water was murkier than on previous visits and on the second dive the area
5					Glyn		at the far end had been badly kicked up and was like a bad day on the
6		<b>2. ( Orca )</b>	17.9m	4c	Chris		Jasper! The cold water caused free flows for John and Glyn, preventing his
7					Ken		second dive. The was also the first dive problems of forgotten kit. Proper
8					Mel		buddy checks are essential to stop this.
9					John		
10	17/02/2017	Capernwray	17m	4c	Glyn	CH	Got off to a good start but Ken had a flood yet surprisingly didn't notice
11		<b>3. ( African Queen )</b>			Chris (V)		it until he came out. His thermals must have been working! He must be up
12					Mel		for a prize at the end of the year with the water at 4c. Heather and Mark's
13					John		son Thomas tried a snorkel in a wet suit which must line him up for a prize
14					Mark		too! Mel kept on loosing his buddies ,(need to put him on a leash)
15					Chris		Chris from Bradford joined us today and dived with Glyn. The last dive I
16					Ken		led a route march dive around the quarry seemingly trying to visit as many
17		<b>4. ( Candida )</b>	17.8m	5c	Chris		sites as possible. My excuse is that finning keeps you warm though a
18					Heather		puffing Glyn wasn't convinced. In all useful shakedown dives to get us sea
19					Glyn		ready, but the cold meant that these were arduous dives and not suitable
20					Chris (V)		for training exercises. Did Dive Leader rescue management scenarios.
21	20/03/2017	Sakwhat Abu Galawa	16.9m	23c	Chris	Chtr.	First dive in slightly breezy conditions. The two sites were colourful and
22					Mel		there did seem to be more fish around compared to last year.
23					Glyn		Water was ok temperature - wise but felt cold when de-kitting
24		Marsa Abu Galawa	17.5m	23c	Chris		
25					Mel		
26					Glyn		
27	21/03/2017	<b>5. Chrisoula K</b>	25.1m	23c	Chris	Chtr.	Wind dropped off completely and we were able to get out to Abu Nuhas
28					Mel		reef. Not too many dive boats on site and we got in three good dives on the
29					Glyn		wrecks there. The Chrisoula K was reasonably intact and we got a good
30		<b>6. S.S. Carnatic</b>	24.2m	23c	Chris		tour of the wreck, inside and out. The cargo of tiles was evident and there
31					Mel		was a good covering of coral. The Carnatic was the most picturesque, with
32					Glyn		an open skeletal structure inside. The boiler was unusual and the prop had
33		<b>7. Giannis D</b>	22.5m	23c	Chris		sawn off ends as to be expected on an early steamship. Portholes were
34					Mel		square with long vertical brass hinges. Stern of Giannis D most interesting
35					Glyn		but rest of this big vessel well broken up
36	22/03/2017	<b>8. Rosalie Moller</b>	38.8m	21c	Chris	Chtr.	A deep dive down to the deck of this upright vessel which reminded me of
37					Mel		the Shuna. The location on a sandy sea bed made it rather silty. First dive
38					Glyn		got into the engine room but was a little crowded and couldn't get to lower
39		Rosalie Moller	35m	21c	Chris		levels. Saw plaque to the diver Darren recovered. Second dive toured the
40					Mel		whole vessel at deck level. Good view from the bow looking back as could
41					Glyn		see as far as the bridge. Ship very much intact.
42	23/03/2017	Shabrur Umm Gamar	33.8m	23c	Chris	Chtr.	Another coral reef with the added attraction of a police patrol boat wreck
43		<b>9.(Police boat wreck)</b>			Mel		on the drop off. The vessel was well broken up with the two diesel engines
44					Glyn		and long prop shafts most evident. Drifted back along a pretty coral wall.
45		Poseidon's Garden	15.5m	23c	Chris		Dived unguided on what is one of the best hard coral patches in the area.
46					Glyn		Huge brain corals and thousands of clams embedded in them. Lots of
47					Mel		bigger fish around here including Yellow Fin Tuna.
48	24/03/2017	Fanadir N	32.9m		Chris	Chtr.	Mel dropped out today and Glyn and I dived unguided. Saw free swimming
49					Glyn		Giant Moray Eels at first site and had a leisurely swim along the outer
50		Gota Abu Galawa	21.8m	23c	Chris		reef edge on the second. So nice to have had the water to ourselves rather
51					Glyn		than following a crocodile of other divers!
52	02/04/2017	<b>10. S.S.Woodburn</b>	10.9m	8c	Duncan	CH	Viz pretty awful after a few days rain but all wanted a shake down dive
53					Derek		whatever the conditions. Chugged round to the Woodburn on one engine
54					John		with a full boat. Need to sort out storage on boat which while same as old
55					Russ		one doesn't have the same space! Russ found location of another letter and
56					Mike		I saw what might be some others peeping out of the chain area. Need to
57					Chris		get back asap with some tools. This now makes wreck no.10 ! Only 15
58					Helen		to go.
59	14/04/2017	S.S.Woodburn	10.6m	9c	V1	CH	Launched the boat after the engines were fixed. Both engines now running
60					V2		properly. Went out to the Woodburn for shake down dives for some and
61					V3		to retrieve the letters which we found on the last dive. Took out five
62					V4		divers from Hitchen club who were at the Isle.
63					V5		Derek skipper
64					Chris		
65					Darren		
66					Glyn		

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
67	15/04/2017	S.S.Woodburn	10.5m	9c	Tony (V)	CH	Chris skipper. Went out to the Woodburn again as it was quite windy and
68					Mia (V)		we were sheltered under the cliffs. Again took out visitors from Glasgow
69					Andrew (V)		and Chester who were camping at the Isle. They had a great dive and Adie
70					Adie (V)		was made up at driving the boat back. Duncan found what looked like an
71					Todd (V)		egg cup piece of brass.
72					Tosh		
73					Duncan		
74					Derek		
75	17/04/2017	S.S.Woodburn	10m	9c	Mel	CH	Jordan's first dive. Found a suit that fitted him well and he had a good dry
76					Jordan		dive. Mike worked with Elizabeth on her bouyancy. Derek and I took Steve
77					Mike		for a tour of the site venturing out to the outer edge. A lot of pollack around
78					Elizabeth		out towards Stein Point. And wrasse and a dogfish on the wreck. Practised
79			13.8m		Chris		DSMB deployment with Steve and did a simulated decompressin stop on
80					Steve		the line.
81					Derek		
82	21/04/2017	Cairn Head	18m	10c	Chris	CH	Dave Cox. Went out to Cairn Head to try out Darren's new twin set rig.
83					Darren		Good 5m viz and lots of dog fish around. Darren floaty towards end.
84	22/04/2017	S.S.Woodburn	12.4m	10c	Chris	CH	Early morning with excellent viz on the site. Ken and Elizabeth much
85					Elizabeth		improved on bouyancy and had good dive. Took video footage.
86					Ken		Visitors for deep dive did not show so took Darren & Jannines' boat for dip
87		Site of Emerald Isle	38.1m	9c	Chris		on site of Emerald Isle. Did search but no sign of wreckage
88	28/04/2017	Cairn Head	18m	10c	Steve	CH	Since it seemed like Sat and Sun were going to be a blow out, for those
89					Derek		who could get there early, we made the most of the weather and got a two
90					Glyn		dive afternoon in. I had to skipper and for the second dive the Bradford boat
91					Debi (V)		came out too. Big spring tides made for fast drifts even though we were
92					Sandra (V)		right on what should have been slack water. One pair spotted an octopus
93					Mark (V)		and came back with a bag of crabs and scallops. The currents took groups
94		S.S.Woodburn	11.4m		Glyn		every which way and one pair ended up over a kilometer from the others
95					Zippy (V)		even though they had gone in at the same place.
96			13m		Mark (V)		The viz was reasonable.
97					Steve		Second dive was current free, but again diving pairs became scattered.
98			14.6m		Kevin (V)		
99					Seth (V)		
100			11.6m		Mick (V)		
101					Chris (V)		
102	07/05/2017	Slockenglassel	17.7m	11c	Mel	CH	Scenic dive in Luce bay after a week of strong easterlies. David the
103					Derek		photographer from D&G Life was with us to take photos for the article.
104					Chris		Afterwards did critter stamping in the pub easy to get 14 common ones
105					Elizabeth		in an average dive. Don skippered
106	18/05/2017	S.S.Woodburn	10.4m	12c	Chris	CH	Only the two of us so we had to anchor bow and stern on the wreck. Viz
107					Dean		only about 3m but we had a good tour round and found a boiler tap.
108		Port Yerrock Mill	5m		Chris		Shaun asked us to recover some creels at Port Yerrock which we did and
109					Dean		then returned for a second go on the Woodburn. Port engine playing up
110		S.S.Woodburn	9.7m		Chris		again with a different fault code this time.
111					Dean		I have now done my 25 dives!
112	19/05/2017	11. S.S.Riverside	22m	12c	Chris	CH	Chris came out with us and minded the boat. Managed to put a permanent
113					Steve		shot on the Riverside. Old bouy wrapped round the rear net. Will free next
114		S.S.Woodburn	9.4m		Chris		dive. Managed to get boat on plane with one engine at around 5500 revs.
115					Steve		Rummaged around on Woodburn.
116	19/05/2017	S.S.Woodburn	9.8m	12c	Mike	CH	Went out for a night dive or at least a twilight dive because of the tide.
117					Duncan		Quite sombre and eerie among the kelp.
118					Glyn		Saw a ling under the flat plates and an odd pulsating white worm swimming
119					Chris		to the surface. Boat flood lights worked well
120					Ken		
121	20/05/2017	S.S.Riverside	22m	12c	Glyn	CH	Slow drag out to the wreck on one engine. Viz was ok at about 3-4 metres.
122					Neil		Large shoal of small pollack off the bow. Managed to untangle the old buoy
123					Mike		line which had wrapped itself around the netting on the stern. The plastic
124					Mel		bottle was still attached though crushed. Floats on surface at LW
125					Chris		
126	24/05/2017	S.S.Woodburn	11.5m	12c	Chris	CH	Russ and I had a good rummage. Tried to sort boat engine afterwards. I
127					Russ		slipped on steps and bust up my leg. No diving for a while!
128	03/06/2017	Cairn Head	16m	12c	Mel	MS	I skippered as my leg was still bad. Good dive for Jordan though viz not
129					Mike		wonderful. Both engines now running well though need to sort tilt fault code
130					Jordan		Mike saw lots of starfish on their backs in one area. Unusual behaviour!

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
131	17/06/2017	12. ADC 527	35.9m	14c	Chris	CH	Split the diving with Pirate Pete taking one boat to Cairn Head for a shallow
132					Mike		dive and the other going out to the Landing Craft for the first time in a while.
133					Mel		Sea was quite rough and on the limit for diving thus making it a challenging
134					Dean		experience for our chaps. Shotted it well and so was able to set off for a
135					Liz (V)		tour round wreck immediately. Viz quite fair at about 5/6m. Lots of big
136					Colin (V)		pollock and wrasse as to be expected. Could not see old shot where I had
137		Cairn Head	12m	14c	Phil (V)	PC	left it! Need new glasses! Recovering shot was difficult because of current
138					Jenny (V)		and swell but when I got boat lined up was able to get it up using the
139					Adrian (V)		sliding buoy. When we were down a sea fret came in and I was glad Chris
140					Debbie (V)		the visiting cox was on board.
141		S.S.Woodburn	10.3m	14c	Chris		Calmer conditions on the Woodburn but the slight swell meant the viz was
142					Jenny (V)		not as good as it had been a few days before. Took Phil and Jenny for a
143					Phil (V)		complete tour of the site
144					Liz (V)		
145					Colin (V)		
146	18/06/2017	13. Great Ouse	20m	14c	Chris	CH	A bit bumpy getting out to Burrow Head but this was due to tide against
147					Elizabeth		wind. Flattened out completely as Luce Bay opened up and we sped out to
148					Jim G		the site. Shotted it right on the mark. Viz not as good as usual but still
149			24.7m		Mel		6/7m. Shoals of Bib and Cuckoo Wrasse and some very big Pollock.
150					Mike		Each of the boiler fire tubes was now home to Tom Pots rather than
151					Mark		Congers with only one small one still there. Other big Congers were
152					Liz (V)		seen around wreck. Good dive to build up Elizabeths experience and show
153					Colin (V)		her a good site. Our boat waited to pick up second wave divers when from
154					Phil (V)		clear blue sky a dense sea fret suddenly engulfed us with only 20m viz.
155					Debbie (V)		Note the tide turned bang on LW and picked up quickly from then on.
156					Adrian (V)		Only came out of the mist as we neared Burrow Head.
157		Devils Bridge	8.2m	15c	Chris		A quick turn around and back out into the fret again. Nice shallow tour of
158					Mel		Devil's Bridge but no seals to be seen. On the way back could not see
159					Heather		the Cairn at all but the harbour was totally clear. Quite a surprise as we
160					Liz (V)		waited for the other boat to see Andy Lockhead come powering out of the
161					Colin (V)		mist just behind us. Engines performed well and good to give them a long
162					Debbie (V)		run. Tilt fault now shows as gauge does not register.
163					Adrian (V)		
164					Jenny (V)		
165					Phil (V)		
166	19/06/2017	S.S.Woodburn	8.2m	15c	Chris	CH	Took Chris out to get him sorted for his first UK dive. Flat calm and just the
167					Chris W		two of us so we could take our time. Lots of jellyfish in the cave.
168	24/06/2017	Cairn Head	18m	15c	Mel	CH	Strong westerlies but quite sheltered at sites. Ran through all the skills
169					Glyn		with Jordan who is very competent. A couple more dives and he can be
170		S.S.Woodburn	13.2m		Chris		signed off. Mel and Glyn got their supper and Mel surprisingly found his
171					Jordan		lost torch!
172	01/07/2017	Cairn Head	18.4m	15c	Chris	CH	Strong winds but sheltered at Cairn Head. After all rain viz was not good
173					Elizabeth		but better than expected. Elizabeth showed good control and awareness
174					Derek		so I was happy to sign her off. Others had a good dive and came back with
175					Steve		something for supper.
176					Dean		Went back out so Chris could try out his new kit. Wind had veered to S
177					Darren		and a slight chop had built up. Had a fair dive and Chris's kit was ok.
178		S.S.Woodburn			Chris		On surfacing we were surprised that a 2.5m swell was hitting the site
179					Chris W		Hard work freeing anchor, getting on boat and getting back in.
180	05/07/2017	14. S.S.Craignair	5m	15c	Mike	CH	Quick trip to knock off two more wrecks. Slack on site on a neap was
181					John		2 hours after HW. Took footage and found ribs marking bow of the Chile.
182		15. Nitrate Clipper Chile	3.4m		Chris		Nasty chop at Burrow head on way back.
183	08/07/2017	16. S.S.Kelvinside	27m	15c	Chris	CH	Another wreck ticked off. Good run out against tide. Used 2.5 cans in all.
184					Derek		Saw two Minke whales feeding around wreck while we waited for slack.
185					Mike		Viz only 5m because of spring tides but wreck heaving with fish (see video)
186		S.S.Craignair	4.2m		Chris		Explored bow again and found lots of teak decking under weeds
187	09/07/2017	Cairn Head	21m	15c	Mike	CH	Hit slack at site so first pair had gentle dive. Viz not at best but a lot of
188					Elizabeth		critters around. Had a good rummage for 53mins on Woodburn. Helen
189		S.S.Woodburn	10.7m		Chris		enjoyed the dive and had good skills control after long lay off. Found some
190					Helen		interesting bits of wreckage
191	12/07/2017	Great Ouse	28.8m	14c	Chris	CH	Decided to go out to Ouse despite being a small spring tide. Running quite
192					Chris W		strongly so went to have a look at gannets on Scares Rock. First pair in
193					John		got end of flood but slack was barely 15mins and second wave were late
194					Mike		and hit the build up of the ebb tide. Missed 3min safety stop so put on O2
195					Ken		as a precaution. Barry, a potential new member, acted as skipper.
196		S.S.Craignair	4.2m	16c	Chris		Took Jordan for a tour but circled most of wreckage without finding big bits
197					Jordan		until half way through dive

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
198	17/07/2017	S.S.Woodburn	9.7m	16c	Chris	CH	Calm but viz only 4m. Went for a grub around on the wreckage. Derek
199					Mike		skipped. Despite the banging Ballen wrasse hung around to look for tit-
200					Helen		bits and a Tom pot was next to me like a robin in the garden.
201	25/07/2017	S.S.Woodburn	11.1m	16c	Chris	CH	Viz very poor because of recent winds even though sea flat calm. Grubbed
202					Ken		our way around and was good training for Chris and Ken. Only lost each
203					Chris W		at end of dive. Slack on Jasper 2hrs before HW on big spring
204	04/08/2017	S.S.Woodburn	10.1m	16c	Mel	CH	Went out for a night dive to test out the lights and give people practice for
205					Dean		the 25 hour dive. Lots of small lobsters prowling around and squatties in
206					Chris		the cave. Quite peaceful out on the wreck at night and the viz is not so
207					Ken		important as you are focussed on a smaller area.
208	06/08/2017	Cairn Head	20m	16c	Chris	CH	Scallop hunt with wind veering to south. Jordan's qualifying dive and a good
209					Jordan		drift mainly over brittlestar beds with tide pulling us out into deep water.
210					Russell		Phil and Mike came across wreckage that might be from the Mulberry
211			22.7m		Phil		harbours and also saw a large Spider Crab which is unusual . The trip back
212					Mike		was rough into the teeth of the wind with a 3 meter swell
213	09/08/2017	Cairn Head	20m	16c	Russ	CH	Mid week dive to look for seafood at Cairn Head. Chance to get people
214					Heather		dived up ready for the marathon event
215					Mark		
216			18m		Mike		
217					Chris W		
218		S.S.Woodburn	14.1m		Chris		
219					Rod		
220					Heather		
221			11m		Mike		
222					Chris W		
223	17/08/2017	S.S.Woodburn	10m	16c	Chris	CH	SE wind putting a swell through the site. Visitors bailed out after 15 mins
224					Lilly (V)		so Mel and I began roping out the site, in challenging conditions, ready for
225					Mel		the weekend. On return decided to call the weekend because of predicted
226					Eric (V)		bad weather
227	19/08/2017	S.S.Woodburn	11.7m	16c	Chris	CH	Weather changing by the hour. Ok to get a dive in under the shelter of the
228					Angela (V)		cliffs. Rope had come adrift from cave end and got round prop. Cut it at
229					Mel		the engine and fixed it off. Will rope out the rest of the site as all found it
230					Jordan		useful to help them explore the site
231					Glyn		
232					Chris B (V)		
233	20/08/2017	Cairn Head	16.8m	16c	Chris	CH	Got out for another scenic dive. Mick skipped for us which made things
234					Chris B (V)		easy. Came back with a big bag of goodies which all enjoyed
235					Hils (V)		
236					Paul (V)		
237					Glyn		
238					Sandra (V)		
239	25/08/2017	S.S.Jasper (17)	18.1m	16c	Chris	CH	Jack skipped so we went to try the wreck for the first time this year. Viz
240					Darren		not too bad at about 3.5m. Found Dean's anchor and recovered it. Hold is
241					Derek		filling with silt so that swim through is narrower. Slack 1.5hr before HW
242	26/08/2017	S.S.Woodburn	10.2m	16c	Chris W	CH	Back to the Woodburn so that first pair could dive unguided for first time.
243					Elizabeth		Elizabeth lost computer so must look for. Connor and I finished roping the
244					Chris		wreck. Now need to add more lead and make up notices to attach to line.
245					Connor		Jack skipped again.
246	30/08/2017	Valhalla (18)	34.4m	16c	Chris	CH	Perfect conditions with good neap tides to try one of the deeper wrecks.
247					Russ		Viz about 4m though dark on the wreck. Well shotted and easy to recover.
248					Mike		Saw some nice brass lamps on side of deck house and the wheel is
249		S.S.Woodburn	7.2m	17c	Chris		ringed with brass. Lots of crabs and lobsters on wreck. Finished with a
250					Russ		bimble on the Woodburn to check out the roping
251	31/08/2017	S.S.Ben Veg (19)	40.4m	16c	Chris	CH	Good trip out and hit water at 1.5hrs before LW. Tide still ebbing but ok
252					Jim G		on wreck. Viz about 12m and the wreck was heaving with fish including
253					John		some big cod. Bottom time only 16mins to avoid too much deco. Slack
254					Mel		kicked in about 45mins before LW. John took good footage on wreck.
255	01/09/2017	S.S.Ben Veg	42.1m	16c	Chris	CH	A bit bumpy getting out today. Shot dragged off but this meant that we
256					Neil		approached the bow which soared up above us. A stunning sight for photo.
257	09/09/2017	Palmallet Point	16m	16c	Mel	MS	Explored new bit of rough ground. Boy Anthony wreck is in this area
258					Darren		
259	17/09/2017	S.S.Riverside	20.4m	15c	Russ	CH	I skipped. Good calm sea and buoy still on wreck. Mussels growing on
260					Chris W		and will be ready next year. A bit murky on wreck and Jim and Chris
261					Jim G		came up on a DSMB.

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
262	18/09/2017	S.S.Jasper	18.1m	15c	Jim G	CH	Wanted Chris to get more wreck experience ready for Oban so we did a textbook dive on wreck. Viz was about 3.5m and we did not kick up much silt. Big lobster was still in his box. On the drift dive Jim saw an octopus and Derek collected some scallops. Towards end of dive current was fast and we picked up divers at Stein Head a good 1.5km from where they went in
263				Mel			
264				Chris			
265				Chris W			
266		Cairn Head	18m		Derek		
267				Jim G			
268	07/10/2017	S.S.Shuna (20)	25.3m	14c	Chris	CH	Up in Oban again. Weather not too good with choppy sea and rain. Big spring tides limited the diving options. Started on the Shuna which was a bit murky with barely 3 to 4m viz. Second dive on the Breda which had slightly better viz. Quite a lot of big pollock on the wreck. Duncan found the bottom half of an arte deco style statue of a woman.

288	08/10/2017	S.S. Breda	21.5m	14c	Chris	CH	Sea calm today for an early first dive on the Breda again. Viz better and we luckily got a dive in before another boat turned up. Quite misty as we steamed up the sound to the Rondo. Arrived to see a sea eagle sitting on the rock where the wreck lies. Dived right on slack and enjoyed reasonable viz. the wreck was much more colourful than all the other dives. Sadly we could not get on the Hispania since scallop dredgers were working in the upper sound sending up a cloud of silt and reducing the viz to nil!

306	27/10/2017	Screens Rocks	17.4m	14c	Chris	CH	Beautiful day and good neap tides so explored Screens rocks and Isle Head. Found a J shaped anchor (?) from Vanderbyl (?) on Screens and a good cliff wall at Isle Head. Lots of life on site and viz at about 3.5m
307				Chris W			
308		Isle Point	18m	14c	Darren		
309				Glyn			
310	28/10/2017	Cairn Head	13.6m	14c	Chris	CH	Howling winds from west but manageg to get visitors from E Cheshire branch out for a good sheltered dive at Cairn Head. We hit a good spot and got a bag full of scallops which I cleaned in boat during second dive. We saw three pipe fish which seemed unafraid of us. Two others saw an octopus which is pleasing since this is our best octopus site. Viz was a reasonable 3.5m which, given the recent rain and wind was not bad.

330	29/10/2017	Great Ouse	25.7m	13c	Chris	CH	Sunny and with low wind so we went out to the Ouse in search of good viz.
331					Glyn		The battery on the hand held failed and so shottng was not pin point. Had
332					Phil (V)		to line off in search of wreck and then dragged shot to it. The viz was not
333					Pat (V)		good at only about 3.5m and it was dark on the bottom. However the wreck
334					John (V)		was still teeming with fish and huge lobsters and everybody had a good
335					Will (V)		dive. Boat kept up a good speed to wreck and with the info from the RNLI
336					Tim (V)		I now think we have it correctly propellored
337					Steve (V)		
338					Clive (V)		
339	02/11/2017	Capernwray	17.8m	13c	Chris	CH	Jaunt down to Capers to clock up a few more wrecks. Finished off the
340		Cleopatra (23)			Neil		remaining OW lessons with Neil and so was able to sign him up as a dive
341					Jordan		leader. Also practised sports dive skills with Jordan. In the process toured
342					Jim G		the whole site but despite our best efforts could not find the diving bell!
343					Dave (V)		Nice sunny day and not many divers so viz very good
344		Murphy (24)	17.5m		Chris		
345					Neil		
346					Jordan		
347					Jim G		
348					Dave (V)		
349	03/11/2017	Capernwray	16.8m	13c	Chris	CH	Cloudy today but viz still good. A group were testing RUVs and electronic
350		Gypsy Moth (25)			Mike		navigation equipment.
351					Jordan		
352			18.7m		Chris		Now have achieved our 25 shipwrecks for our 25th anniversary
353		Dreamer (26)			Mike		
354					Jordan		
355	19/11/2017	Cairn Head	19.4m	12c	Chris	CH	Big tides so went out for a quick drift dive. Water looked clear at surface
356					Derek		but a lot of silt in suspension lower down making viz only 2.5m. Gary
357					Duncan		skipped for us. Once the current picked us up quite a scenic drift over
358					Elizabeth		the rocky ridges. Second pair became separated and only had a short dive
