

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
1	16/02/2018	Kenmore Point, Loch Fyne	20.1m	9c	Chris	CB	Diving on a trip organised by Chris Bell from Bradford Branch.
2					Derek		The site was a steep wall accessed by boat. The cliff fell off to 50m and
3					Paul		beyond but we stayed shallow and examined the crevices which were filled
4					Hilary		with Squat Lobsters. Rock surfaces were covered with Sea Loch Anemones
5					Glyn		A halocline affected the top 4m where the peaty fresh water was only 5c
6					Chris (B)		Viz below was good at about 8m
7		Creggans, Loch Fyne	25.8m	9c	Chris		Again surface water was freezing. A silty slope stretched down to the
8					Derek		depths covered with hermit crabs and spider crabs. Also lots of big spiny
9					Paul		starfish. Viz was a bit less than previous site as prevailing wind was
10					Hilary		making waves. Found a torch on bottom which still worked
11					Glyn		
12					Chris (B)		
13	17/02/2018	Kenmore Point, Loch Fyne	19.7m	9c	Chris	CB	Returned to Kenmore Point since planned site had lots of shore divers.
14					Seth (B)		moored in North bay this time and examined the northern part of the wall.
15					Paul		Access through profuse bladderwrack was a pain. Seth remained close
16					Hilary		and had good bouyancy. Saw a Sea Lemon on the bottom. Again lots of
17					Glyn		Squatties and Sea Loch Anemones as well as Yellow Lipped Sea Squirts
18					Derek		Engine problematic on way back
19		MOD Reef, Loch Fyne	19.5m	9c	Chris		A silty slope led down to a patch of undulating sandy ridges. However
20					Seth (B)		at 20m found a boulder reef and retrieved a dozen golf balls from among
21					Paul		the rocks. Cold doing our safety stop in the shallower water.
22					Hilary		
23					Chris (B)		
24					Derek		
25	18/02/2018	Quebec wrecks, Loch Fyne	18.8m	10c	Chris	CB	A very cold surface swim out to the wreck site through 4c water. Went
26					Seth (B)		downline to first wreck. Viz was about 9m at first and we could easily see
27					Glyn		a second wreck to swim to. Then lined out and found two further wrecks.
28					Derek		Practised DSMB deployment and simulated deco stop on line with Seth.
29					Sandra (B)		Along cold swim back to shore
30	24/03/2018	S.S.Craignair	4.1m	6c	Chris	CH	Good weather but viz awful after last weeks storms and rain. Less than a
31					Chris W		metre. Tried Cairn Head first but then went round to the Craignair but
32					Barry		viz still awful. Lined off so thatrest could find wreckage. Chris stuck to me
33					Grant		like glue which was good as I was sure we would lose each other.
34	25/03/2018	S.S.Woodburn	6.5m	6c	Grant	CH	Viz still awful but managed to find our way round the Woodburn. Training
35					Dean		dive for Paul so showed him around the site. Blue rope everywhere which
36					Chris		needs cutting off asap. Stirred it up a bit so dropped John and Elizabeth
37					Paul		in at Cairn Head. Viz worse there So short dive playing with DSMB
38		Cairn Head	9m	6c	Elizabeth		Recovered rope for Shaun as creel smashed and full of stones in tight
39					John		gully
40	31/03/2018	Slockenglass	21.5m	6c	Chris	CH	Strong easterlies forced us into Luce Bay on a big spring tide. Wind icy
41					Glyn		cold. Viz only 1.5m did a drift along a seabed full of Dahlia Anemones.
42					Chris W		Andy skippered with Derek coaching.
43	20/04/2018	S.S.Woodburn	10.5m	7c	Mel	CH	Had a quick run round to the Woodburn to collect the blue rope that was
44					Derek		littering the wreck. Sea felt cold and viz was about 3m.
45					Barry		
46	21/04/2018	Cairn Head	17m	7c	Derek	CH	First nice sunny day in ages and sweated in our suits that is until we hit
47					Neil P	AP	the water. Hit the site on slack and had fair viz at about 4m. Not many
48			16m		Chris W		around yet but we did manage to get a few scallops. A lot of big newly
49					Duncan		dead scallops on seabed. Chris and Elizabeth practised DSMB skills.
50			18.2m		Chris		Came back to live reggae music outside the Steampacket. What with the
51					Elizabeth		glorious sunshine we could have been in the Caribbean!
52	27/04/2018	Slockenglass	18.8m	7c	Chris	CH	Andy skippered. Slack bang on HW Spring. Viz a good 4m. Most critters
53					Derek	AP	still dormant. Watched an amemone eating a crab with whelks moving in.
54	28/04/2018	Cairn Head	17.5m		Mel	MS	Andy skippered and Mel dive managed. Most of us doing lectures in
55					Glyn	AP	Newton
56					Barry		
57					Derek		
58	04/05/2018	S.S.Jasper	17.5m	8c	Chris	CH	Had to put shot on wreck and my buddy bailed out. Other pair got to wreck
59					Kevn (B)	AP	but one had bouyancy problems so a short dive for them.
60					Steve (B)		
61		Cairn Head	20m		Chris W		Good drift on the site. Derek got a few scallops
62					Mel		DO6 with Mel
63					Glyn		
64					Derek		
65					Sandra (B)		

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
66	05/05/2018	S.S.Riverside	22.1m	8c	Chris	CH	Quite a swell but I got down to put a temporary permanent shot on the
67					Steve (B)	AP	wreck. Three were too sick to dive but got a pair in using the fixed shot
68					Amar (B)		
69		Port Yerrock Bay	8m		Glyn	DF	Very rough and nil viz so very short dives
70					Angela (B)		
71					Duncan		
72					Elizabeth		
73					Eddie (B)		
74					Phil (B)		
75		Cairn Head	17m		Derek	GM	Glyn took boat out for a drift at Cairn Head. Sandra practised DSMB
76					Seth (B)		Skills with Elizabeth. Got a few scallops
77					Amar (B)		
78					Sandra (B)		
79					Elizabeth		
80		Chapel Port East	10m	9c	Jordan	CH	Shore dives and first dives for Matthew, Calum and Shannon. They all did
81					Chris W		well and seemed happy under water. Can now take them out in the boat
82					Grant		to the Woodburn which will be less of a chore than stumbling down the
83					Ombretta		Beach. Viz was a bit limited until we got to deeper water what with 14
84			6m		Kevn (B)		divers wading in. The wave surge was moving the weeds to and from which
85					Phil (B)		caused a few to feel queasy
86					Eddie (B)		
87					Angela (B)		
88			10m		Duncan		
89					Matthew		
90					Chris		
91					Calum		
92			14m		Mel		
93					Shannon		
94	06/05/2018	S.S.Woodburn	7m	9c	Glyn	CH	A sea fret prevented us going out for the planned dive but went out when
95					Amar (B)	AP	it seemed to clear. Viz at first a bit murky but current began to flush
96			9.2m		Chris		through site at mid tide and cleared water. All of us got a bit lost on site
97					Angela (B)		despite knowing it well and current swept Mel and Seth off. On surfacing
98			8.5m		Mel		dense fog had returned and we worried in case last pair had also been
99					Seth (B)		swept off site. Happily they surfaced on site on time.
100			6.2m		Chris (B)		
101					Elizabeth		
102	07/05/2018	S.S.Riverside	21m	9c	Chris	CH	Much calmer than previous trip out and shot had held. Plankton bloom
103					Elizabeth	AP	has set in and water like pea soup. Dark on wreck and silt quickly kicked
104					Glyn		which caused second pair to cut dive short. Nets on wreck have moved and
105					Seth (B)		original shot pulled down with weight of mussels and wrapped round nets.
106		Cairn Head	12m	9c	Mel		Needs sorting before we send less experience divers down.
107					Derek		Nice second dive on Cairn Head with plumose anemones out. Creatures
108			16.2m		Chris		still dormant and not much sign of life
109					Seth (B)		
110	13/05/2018	S.S.Jasper	17.8m	9c	Chris	CH	Managed to get a permanent line on the wreck which will make things
111					Derek	AP	easier. Viz pretty poor after Fridays bad weather+. Still not much fish life
112					Duncan		around. Took Matthew for his second sea dive. He did well with good
113					Elizabeth		bouyancy and he coped well with the poor viz. Toured the site and played
114		S.S.Woodburn	9.8m		Chris		with quite a large pipefish which was still semi dormant
115					Matthew		
116					Duncan		
117					Elizabeth		
118	14/05/2018	S.S.Jasper	18.3m	9c	Chris	CH	Went out to the Jasper again to recover strobe. Very enjoyable dive in
119					Mel	AP	moderate viz with no one kicking up the silt. Saw another pipefish just
120					Mike		like the previous day. DO7 with Mel
121		Stein Point	9m		Mel		Mel went down to free a lobster pot but was not the one we were after.
122		S.S.Craignair	4.8m	10c	Chris		Viz quite good on wreck for Suzie's first dive. She did well but felt over
123					Suzie		tasked by the open water experience. Post dive went out again to rescue
124					Mike		a yacht in trouble off Burrow Head and towed him back to the Isle
125	18/05/2018	S.S.Woodburn	10.2m	10c	Chris	CH	Mike skippered. Took Helen for her first dive in a while. Spent an hour
126					Helen		rummaging around.
127	26/05/2018	Rock of Providence >NW	17.7m	11c	Chris	CH	Very strong easterlies meant that we had to go round to Luce Bay where
128					Glyn	AP	the water was calm. After long dry calm spell viz was exceptional at about
129					Derek		10m. Andy skippered and we were accompanied by visitors from
130			14m		Paul (V)		Merseyside in their boat Nemo. Drifted almost to St Ninian's Cave. Our
131					Carol (V)		visitors were confused by the conflicting currents and their first pair were
132					Mark (V)		on the rocks signalling as they didn't drift.
133					Jim (V)		Saw an octopus on the drift and plenty of fish life which now seems to
134					Kevin (V)		have woken from it's winter slumbers.
135					John (V)		
136					Andy (V)		

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
137	26/05/2018	S.S. Craignair / Chile	2.7m	12c	Chris		We pressed on and dived the Chile, again with excellent viz.
138					Glyn		Very big seas on way back round Burrow Head and we just got back with
139					Derek		seconds to spare and just got on to the mooring.
140	27/05/2018	Slockenglass / Stank	17.6m	12c	Chris	CH	Even windier than day before so went back to same area. I took Shannon
141					Shannon	AP	in for only his second dive and he did well and was blown away by the viz
142			22m		Mel		and sea life. Got a big lobster but it was berried so had to get a smaller
143					Derek		one for his dinner. We did not drift but Mel's group went deeper and caught
144					Glyn		the current. Our visitors ended up having to sit in the choppy waters
145			17m		Paul (V)		and wait for their divers. Again we pressed on to the Chile and I did a
146					Carol (V)		guided tour of the site
147					Mark (V)		Coming back we hit even bigger seas round the point which was good
148					Jim (V)		practise for Andy.
149					Kevin (V)		
150					John (V)		
151					Andy (V)		
152		S.S. Craignair / Chile	3.2m	12c	Chris		
153					Shannon		
154					Mel		
155					Derek		
156	31/05/2018	Cairn Head	16.4m	12c	Chris	CH	Good visibility and flat calm.
157					Matthew		
158					Russ		
159					Derek		
160					Darren		
161					Mike		
162		S.S.Woodburn	10.1m	13c	Chris		Quick lifting exercise with Mike.
163					Mike		
164	01/06/2018	Cairn Head	18m	12c	Duncan	CH	Excellent dive with good viz again. Saw an octopus and Darren found
165					Barry		a small spider crab camouflaged with weeds.
166			19m		Russ		Practised skills with matthew on Woodburn
167					Jim G		
168			22.4m		Chris		
169					Darren		
170		S.S.Woodburn	11.9m	13c	Chris		
171					Duncan		
172					Matthew		
173	02/06/2018	S.S.Riverside	26.3m	12c	Chris	CH	Strong current getting down to wreck. Came back with a big bag of
174					Derek		mussels which are festooned on the old shot hanging from the stern.
175		Cairn Head	21m		Russ		excellent viz of 8m with all anemones out in current
176					Darren		
177			15m		Duncan		
178					Shannon		
179	03/06/2018	S.S.Woodburn	12.5m	12c	Chris	CH	Qualifying dive for Shannon. Found Elizabeths lost computer as we
180					Shannon		explored
181	08/06/2018	Rock of Providence >NW	14m	13c	Chris	CH	Excellent viz continues at about 10m. Did a drift with Callum who seemed
182					Callum		composed in the water and soon got his bouyancy right. Paul did well too
183			18m		Neil P		and can soon be signed off.
184					Paul		
185	09/06/2018	Great Ouse	24.2m	13c	Russ	CH	Fine weather so took a run out to the Ouse. Good viz but not best I have
186					Barry		ever seen on wreck. Lots of fish but not the shoals of pollock we usually
187			20.2m		Jim G		see. Found a good anchor and chain and wondered if fishermen had
188					Reagan		fished it out. Good dive for Reagan as it is one of her first sea dives.
189					Chris		Elizabeth needs to adjust her diving position, maybe ditch ankle weights
190					Elizabeth		On way back in went looking for Andy's pot off Devils Bridge. Never dived
191		Devils Bridge Outer Reef	10.2m	14c	Chris		here before and stunning topography with crevices and tunnels. Jim found
192					Barry		pot . Total slack here is about 1 hour after low water. This was the area
193					Jim G		where the current runs through like a river mid tide.
194					Reagan		
195	10/06/2018	Slockenglass	17.2m	14c	Jim G	CH	Back out for a drift again on HW. Sea like glass and viz equally good.
196					Reagan		While first pair were in Duncan and I climbed onto the rock to retrieve
197			17.5m		Chris		a good long length of lobster line which has been there for months
198					Duncan		Second dive on the Woodburn. Took Jim and reagan round and Duncan
199		S.S.Woodburn	9.2m		Jim G		took photos.
200					Reagan		
201					Chris		
202					Duncan		

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
203	13/06/2018	S.S.Woodburn	9.2m	14c	Chris	CH	Quick dive to practise skills with Paul. Good bouyancy and comfortable
204					Paul	AP	with all others skills. So Paul is now an Ocean Diver
205	21/06/2018	Screens Bay	19.6m	14c	Chris	MS	Tried this area just further along than Screens Rocks. Pretty flat seabed
206					Paul	AP	anemones. Further explored the new site at Devil's Bridge. Mel lost a
207					Mel		weight.
208		Devils Bridge Outer Reef	13.1m	14c	Chris		
209					Mel		
210	22/06/2018	MFV Valhalla	33.4m	13c	Chris	MS	Shotted the wreck but shot in very silty seabed which kicked up. Lots of
211					Mel	AP	Lion's Mane Jellyfish and we all were stung, Mel taking a bad reaction to it.
212					Dean		Managed to get a permanent shot fixed to wreck which will make visiting it
213		Devils Bridge Outer Reef	13.2m	14c	Chris		easier.
214					Dean		Second dive better with very good viz
215					Chris W		
216	23/06/2018	ADC 527	35.4m	13c	Chris	CH	A bit choppy going out and unsure about shot placement. Current strong
217					Duncan		and had to pull down line. Duncan's pony came loose so had to carry it.
218					Jim G		Shot wedged in a rock which was useful but had to reel off to find wreck
219					Russ		and then drag shot near. Tied it in to wreck though almost lost it when I
220					Liz (V)		let go of wrong line. Viz on wreck excellent and teeming with big fish
221		Devils Bridge Outer Reef		14c	Chris		Did a quick tour of rear end before coming up.
222					Chris W		Gentle dive at new site where Duncan got some good photos. I managed to
223					Derek		navigate back to boat amazingly only to find boat had up anchored!
224					Duncan		
225					Liz (V)		
226					Chris (V)		
227	24/06/2018	ADC 527	40.5m	13c	Liz (V)	CH	Flat calm early morning dive. Since Chris missed the wreck yesterday
228					Chris (V)		took them back this morning. Slack set in 25mins before HW on a mid
229		Slockenglass	19m	14c	Liz (V)		range tide. Followed this with a scenic dive with little current close in.
230					Chris (V)		
231	27/06/2018	S.S.Jasper	17.6m	14c	Mel	MS	Went out to see what had happened to the shot. Mel shotted wreck
232					Russ		very well. Good 6m viz and took chris for a tour. Shot had wrapped round
233					Chris		old lines and tangled in wreck. Disentangled it and in process created a
234					Chris W		cloud of silt. Chris's bouyancy was good.
235		Cairn Head	18m	14c	Mel		Next dive at the scallop beds. Russ snagged going in and lost his reel
236					Derek		but Derek recovered it.came back with a good haul of scallops.
237					Russ		Last dive was to look for lost weight pocket but as soon as we saw the
238		Chapel Port East	8.3m		Chris		kelpy seabed we realised there was no hope. Practised sport diver skills
239					Chris W		with Chris instead
240					Derek		
241	30/06/2018	S.S.Jasper	17m	15c	Chris	CH	Pretty choppy but wind dropping so went out to dive the Jasper. Good viz
242					Peggy (V)		at 5/6m so toured the wreck. Lobster not in his box but plenty of fish
243					Duncan		around. Swam through the wreck and missed a good photo opportunity as I
244					Chris W		I came out at the bow with wreckage and fish backlit.
245					Derek		to get the slack went round to Luce Bay for a scenic drift. Took some good
246					Mike		footage and just as I was leaving saw and filmed a large spider crab, the
247		Slockenglass	17.8m	15c	Duncan		first I have ever seen on our stretch of coast.
248					Chris W		
249			15.9m		Derek		
250					Mike		
251					Chris		
252	01/07/2018	S.S.Jasper	17.7m	15c	Chris	CH	Good dive on the Jasper with reasonable viz. Got some good footage
253					Ombretta		swimming out through the bow. A lot of fish on the wreck.
254					Chris W		Good second dive on the Woodburn. Gave Grant a proper tour of the wreck
255					Tosh		site. Chris W practised DSMB skills
256		S.S.Woodburn	13m		Chris		
257					Grant		
258					Tosh		
259					Chris W		
260	06/07/2018	S.S.Riverside	21.4m	15c	Chris	CH	Grant had ear problems so just got Chris down on the wreck. Poorish viz
261					Chris W		but Chris had excellent buoyancy for whole dive. Collected mussels from
262		Devils Bridge Outer Reef	9.7m	16c	ChrisW		rope. Good seal interactions at Devils Bridge, but camera battery flat!
263					Grant		Viz here much better and plenty of fish around

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
264	07/07/2018	Site of Solway Hunter	15m	16c	Chris	CH	Went out to look for Sam Archer's boat. Got a reasonable mark on the
265					Tosh		sounder and tosh and I went down for a look. Flat silty sea bed with about
266		Devils Bridge Outer Reef	12.1m	16c	Duncan		3m viz. Did a circular search for 35 mins but found nothing.
267					Grant		Went to Devil's Bridge and had a good dive in much better viz. Mike and
268					ChrisW		Chris saw the seals again
269					Mike		
270					Chris		
271					Tosh		
272	08/07/2018	Great Ouse	24.8m	16c	Chris	CH	Excellent 14m viz and shoals of Bib and Pollack. Took some good footage
273					Duncan	AP	of the fish. Bucket chain part of the wreck is beginning to rust away.
274					Shannon		All of us had a really good dive. Devil's Bridge was equally good.
275					Mel		
276					Elizabeth		
277					Russ		
278					Jim G		
279		Devils Bridge Outer Reef	12.8m	16c	Mel		
280					Jim G		
281					Chris		
282					Shannon		
283					Duncan		
284					Elizabeth		
285	11/07/2018	Stank	19.6m	16c	Chris	CH	Went for a gentle drift so Chris could practise DSMB skills. Saw a
286					Derek	AP	Smooth Hound Shark and various other fish as we drifted along. Afterwards
287					Chris W		took Russ and Kyle for a tour of the Chile, Kyle did well for his first time
288		S.S.Craignair / Chile	4.2m	16c	Chris		in the water. Chris practised roping off around the wreck
289					Russ		
290					Kyle		
291					Derek		
292					Chris W		
293	14/07/2018	Cairn Head	18.8m	16c	Chris	CH	Took Ian out for his first dive with us. Big tides and this seemed to have
294					Derek	AP	stirred the silt up so viz of only 3m. Ended up drifting but still managed to
295					Ian		get a few scallops. Lots of small scallops on site now
296	20/07/2018	Cairn Head	13.1m	16c	Chris	CH	Tried for a dive on the Jasper first but too silty.
297					Matthew	AP	Viz still not too good at Cairn Head but had a reasonable dive.
298					Ian		
299					Barry		
300					Grant		
301					Ombretta		
302		S.S.Woodburn	5.4m	16c	Ian		Practised skill with Matthew. Just need to do some rescues and mask
303					Barry		work now
304					Grant		
305					Ombretta		
306					Chris		
307					Matthew		
308	21/07/2018	ADC 527	36m	16c	Chris	CH	Wind was ok so we went for the Landing Craft. Quite a pull down line
309					Derek	AP	which is well attached, but hit slack near bottom. Viz a good 6/7m
310					Russ		and took some footage of wreck. Dereks first dive at this depth and he did
311					Glyn		well.
312		Devils Bridge Outer Reef	13.5m	16c	Grant		Lovely relaxing dive on this new site afterwards. Lots of fish and good viz.
313					Ombretta		
314					Chris		
315					Shannon		
316					Ian		
317					Glyn		
318					Russ		
319	03/06/2018	Puerto Del Carmen, Lanzarote	25m		Mel	MS	Club trip to Lanzarote
320					Glyn		
321			26m		Mel		
322					Glyn		
323	04/06/2018	Charco Del Palo, Lanzarote	27m		Mel	MS	Club trip to Lanzarote
324					Glyn		
325			25m		Mel		
326					Glyn		
327	05/06/2018	Puerto Del Carmen, Wrecks	29m		Mel	MS	Club trip to Lanzarote
328					Glyn		
329			29m		Mel		
330					Glyn		
331		Costa Teguib, Lanzarote	5m		Andy		
332	06/06/2018	Playa Blanca, Sculpture Park	17m		Mel	MS	Club trip to Lanzarote
333					Glyn		
334			17m		Mel		
335					Glyn		
336		Costa Teguib, Lanzarote	5m		Andy		

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
337	22/07/2018	Screens Rocks	17.9m	16c	Grant	CH	A full boat with 9 divers so took the opportunity of good tides to dive the
338					Ombretta	AP	Screens. Viz was a good 6m and there were shoals of large Pollack on
339					Duncan		the point. Because of the current that normally runs through site the area
340					Derek		is teeming with life.
341					Mike		
342					Chris		
343					Ian		
344		Devil's Bridge Outer Reef	13.8m	16c	Chris		Another good dive at new site
345					Glyn		
346					Duncan		
347					Derek		
348					Mike		
349					Elizabeth		
350	03/08/2018	Cairn Head	18m	17c	Derek	CH	
351					Paul		pairs had a good exploration on slack water, and Darren saw a very large
352			17.5m		Darren		Pipefish. Ian and I caught the current which picked up 1/2 hour before HW
353					Chris W		on a neap tide. We flew along collecting supper as we went. Amazingly
354			20.8m		Chris		I found Darren's DSMB which he lost a few months ago. Good practice
355					Ian		for Ian
356	04/08/2018	ADC 527	34.9m	17c	Chris	CH	A bit dark on the Landing Craft and we luckily still had a bouy on it as the
357					Russ	AP	line had been chewed by a prop and was hanging by a thread. Fixed this
358		Devil's Bridge Outer Reef	12.8m	17c	Chris		and got a good look at wreck for a new picture.
359					Ian		Chris navigated us around second site
360					Chris W		Port engine not working on bottom cylinder
361	05/08/2018	S.S.Riverside	21.7m	17c	Duncan	CH	A bit murky on the wreck but good experience for Ian. Mussel line was
362					Derek	AP	empty. Viz much better at Cairn Head. Gentle drift to the north which soon
363					Chris		died 1 hour after LW. Loads of Scallops in brittle star be off the point.
364					Ian		
365		Cairn Head	14.3m	17c	Duncan		
366					Ian		
367					Chris		
368					Derek
